

# Technical Description

## Extractor Kit Filter

Part No. 70312427

### All Carbon Refillable Filter for EK 1000-3000

Thin walled anodized aluminum sections with a high corrosion resistance against most solvents. In contact with alkaline materials the surface may be stained or damaged. Best resistance between PH 4 and PH 9.

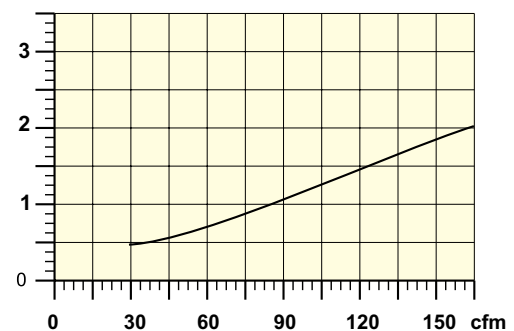

Technical Data	
<b>Material</b>	
Cylinder	Cellulose Paper
Filter Media	Activated Carbon
Filter Seal	Neoprene Rubber
<b>Total Weight</b>	19.8 lbs
<b>Carbon Weight</b>	14.3 lbs
<b>Carbon Form</b>	Coal based pellet
<b>Size</b>	3 mm / .3 cm

### Static Pressure Chart

under normal working conditions

in. W.G.

### Filter Lifetime

Carbon filter lifetime is determined by numerous factors, such as:

- filtered particulate
- concentration of filtered particulate
- effectiveness of carbon on filtered particulate
- duration of use
- other particles in airflow
- volume of air being filtered
- crossing air flows or drafts
- closeness to source of generated particulate

Part No. 70312427 has a shelf life of 2 years.
