

Features & Benefits

Series 32

System 32 is a range of smooth, easily installed arms, hoods, cabinets and down flow grills, for capture of fumes and gases. All of them with a connection of 1 ¼" diameter. The arms can also be connected to 1 ¾" hose.

Arm FX 32 is a 3 ¼' long, flexible arm delivered with damper and swivel for bench mounting. Standard and ESD Safe are the various models. The Standard and ESD Arm can be supplied with a light package for special applications.

Down Draft Grill FD 32 is a discrete capture plate which is mounted in the surface of the work bench. It is highly effective for capture of heavy gases and fumes. It is made from stainless steel with a diameter of 10 ¼".

Fume cabinet FC 35 is a smooth cabinet made from clear PET-plastic. The compact design 11 ¾" x 7 ¾" x 9 ¾", makes it easy to put anywhere on the work bench. No greater airflow is required to obtain good operation.

Accessories

Hoods

Dome hood and extraction hood, both in clear plastic or ESD version, to be used with the FX 32 arm or the grill FD 23. Flange hood in clear plastic for the FX 32 arm.
