

Case Story

Extraction of welding fumes at the Olympic Airlines maintenance workshop

Situation: At the Olympic Airlines maintenance workshop of the Athens International Airport, welding fumes were generated at various positions which the installed central fume extraction system could not reach. To cover the whole workshop, a flexible solution was needed.

Solution: A FilterCart Original with a 2m extractor arm and HEPA filter was purchased to manage the welding fumes at the various places in the workshop.

Benefits: The flexibility and filtration efficiency of the FilterCart with HEPA filter, were to the satisfaction of both employees and workshop administration.
