

Case Story

Heavy pipe fabrication with fume problems

Situation: At INTERSERVE Industrial Services PLC, UK, when MIG-welding with flux cored wires, the fumes became a health hazard for the employees and had a negative impact on the workshop environment.

Solution: NEDERMAN UK Installation Division in partnership with General Welding Supplies of Widnes, Cheshire specified a FILTERMAX FO 90 with NCF 120/25 Fan, running 8 x 7.5m hinged extension arms fitted with extension hoods.

Benefits: Removing welding fume from workspace. Cleaner and safer working environment for all employees and a more productive workforce with less time spent changing PPE filters etc.
